SUMMARY

Rafiq is a Senior Frontend Engineer with over 8 years of experience delivering full-stack React and Angular webapps, with an emphasis on component-driven design architecture and accessible UI/UX solutions.

EXPERIENCE

Senior Frontend Engineer

Deloitte

📅 Mar 2022 — Present

Application Design, OTP, Contentful Development – State of Ohio

- Redesigned Statewide One-Time Password system with modern NodeJS AWS stack: Lambda, DynamoDB, SES, & SNS.
- Translated Figma Help Desk UI design into a novel NextJS application with API-driven data fetching, filtering, and pagination.
- Developed custom React UI components & accompanied Storybook UI display compatible with client's internal design system.

Individual Online Account: Forms — Department of Treasury: IRS

- Led the design and development of a functional UI suite for embedded forms, enhancing the user experience for 23 million unique users between 2023 and 2025.
- Developed comprehensive Jest unit test suites, achieving a minimum of 80% code coverage throughout the application.
- Leveraged the React Context API to maintain data state integrity across the application's notification system.
- Mentored junior developers through peer code reviews and regular one-on-one design/engineering discussions, fostering a collaborative environment.

AngularJS Modernization: Internal — Michigan DHHS

- Revitalized legacy AngularJS application with migration to Material-UI React, improving maintainability and application speed.
- Implemented state management and async API endpoints using Redux thunk middleware, improving application responsiveness.

Admin Console: Audits — Texas Department of Transportation

- Refactored synchronous Angular code to utilize Angular RXJS observables, improving data load times and time-to-interactive (TTI).
- Simplified end-to-end API with improved SQL and Hibernate persistence wrappers, reducing the number of necessary API calls by 50%.

Systems Developer

Accenture Federal Services

📅 Jun 2017 – Mar 2022

Federal Student Aid (FSA) — Department of Education

- Configured Hibernate criterion and API response body structures for a custom Selenium persistence layer, improving data handling efficiency.
- Spearheaded a design overhaul for Section 508 compliance, ensuring the application met accessibility standards.

LANGUAGES

C# CSS HTML Java JavaScript
SQL TypeScript

FRAMEWORKS

Angular Astro Bootstrap Express
Material-UI NextJS React

TECHNOLOGIES

Agile Axios AWS Contentful
